FILTER COFFEE

Percolator

The taste of quality worldwide

■ Percolator

The Percolator from Bravilor Bonamat allows you to brew large quantities of coffee. You need to fill the Percolator manually with water. In addition, you fill the stainless steel filter on top with course-ground coffee. Then, simply switch the unit on. At the end of the brewing cycle, the Percolator automatically switches into the 'keep warm' mode.

The manual tap allows you to dispense as much coffee as needed. Note that the Percolator keeps the coffee warm for as long as the unit is on.

The gauge glass shows you how many coffee still remains in the Percolator. On top of that, the heatproof handles are easy to allocate the Percolator.

- Made of double-walled stainless steel
- Stainless steel tap and filter
- Shatterproof gauge glass
- Boiling-dry safety mechanism
- Clear ON/OFF switch
- Automatic 'keep warm' mode

Did you know that the Percolator 125 can handle exactly 1 kg of course-ground coffee? Easy as that!

Technical details

| Specifications | Percolator 45 | Percolator 75 | Percolator 125 |
|---------------------|-----------------------|------------------------|------------------------|
| Holding capacity | 6 litres | 10 litres | 16 litres |
| Throughput per hour | 10 litres | 15 litres | 24 litres |
| Rated power | 230V~ 50/60Hz 950W | 230V~ 50/60Hz 1650W | 230V~ 50/60Hz 2600W |
