# BRAVILOR BONAMAT

## Ultimate convenience

The Rivero Turbo/Bolero Turbo series is designed with the end user in mind. The illuminated front panel immediately attracts attention. And the intuitive user interface has clear push buttons, so everyone can obtain their cup of coffee quickly and easily.

The user-friendly design and robust materials ensure that the Rivero Turbo/Bolero Turbo series is perfect for many locations such as fast-moving self-service areas in service stations, convenience stores and kiosks. In short: these machines are the ideal front-of-house solution!

## Quick dispensing

As the name *Turbo* suggests, the machine has been developed for places where there is high demand for coffee. Each cup is served quickly, and the Rivero Turbo 203 even has the facility to make two cups of coffee simultaneously.

- ✓ For locations with a water supply
- ✓ Separate hot water outlet for making tea
- ✓ Eye-catching LED-illuminated front panel
- ✓ Cup lighting and cup sensors
- ✓ The standard Bravilor Bonamat descaling indicator, descaling program and rinsing program

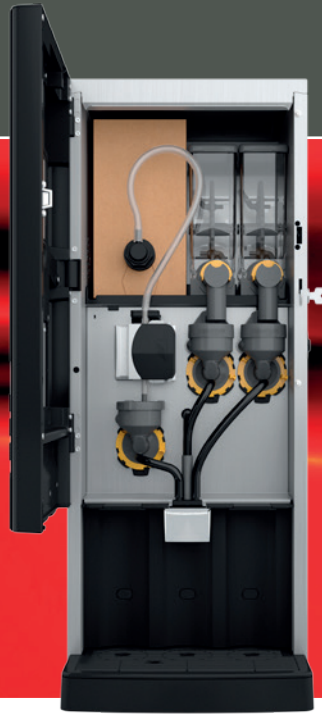

## Maintenance-friendly

- Servicing instructions are shown inside the front door. Servicing operations include emptying the drip-tray, descaling the heating system and replacing the Bag-In-Box container.
- The patent Bravilor Bonamat hot water system minimises limescale within the boiler, thus reducing the need for maintenance and for maintenance services!
- The patent Bravilor Bonamat ingredient mixing system prevents clogging in the mixing units, thus optimising the flow of ingredients.
- The drip-tray has a large 3 litre capacity, so it does not overflow quickly. Of course if desired the machines can also be connected to a drainage system.

## Energy-efficient

When the machine has not been used for a certain length of time, it automatically switches into energy-saving mode. This feature, together with the well-insulated boiler, keeps energy consumption low.

## ■ Rivero Turbo 203

- 2 BIB (Bag-In-Box) containers
- Separate hot water outlet
- Choice of 3 hot drinks
- Simultaneous serving of 2 drinks

The Rivero Turbo 203 can accommodate two BIB containers of concentrated coffee, max. 3 litres each, for 2 hot drinks. In addition the machine has a separate hot water button for tea, soup, etc.

Choose your favourite flavour: dark roast, medium roast, decaffeinated or a premium coffee from the wide choice of blends available as BIBs.

The machine can make two drinks at the same time, so you can serve your customers even more quickly.

## ■ Rivero Turbo 121

- 1 BIB (Bag-In-Box) container
- 2 canisters for instant ingredients
- Separate hot water outlet
- Choice of 6 hot drinks

The Rivero Turbo 121 can accommodate one BIB pack of concentrated coffee, max. 3 litres. The two canisters can be filled with instant ingredients.

The machine has 6 drink selections including hot water. The other five selections depend on the instant ingredients chosen.

For instance coffee, café au lait, cappuccino, hot chocolate and moccachino can be prepared using topping (milk powder) and cocoa.

## ■ Bolero Turbo 331

- 3 canisters for instant ingredients
- Separate hot water outlet
- Choice of 6 hot drinks

The Bolero Turbo 331 uses only instant ingredients.

The machine offers 6 drink selections including hot water. The other five selections depend on the instant ingredients chosen.

We have preset the most commonly chosen drinks for you as standard: coffee, café au lait, cappuccino, hot chocolate and moccachino. And of course there's also hot water available for tea and soup, etc.

### Transparent canisters

The resealable Bravilor Bonamat canisters are transparent, so you can see immediately when an ingredient needs to be refilled.

### Safety

The red STOP button is instantly recognisable, so anyone can stop the machine instantly if required.

### Branding

Depending on the number of machines required, the illuminated front panel on the Rivero Turbo/Bolero Turbo can be customised as desired, for use as marketing to promote your own (coffee) brand.

Please contact Bravilor Bonamat directly for more information.

### Trusted technologies

Reliable, long-lasting and safe. Bravilor Bonamat has been committed to these principles since its foundation in 1948.

Characteristics of the Rivero Turbo/Bolero Turbo series:

- The number of millilitres per drink can be set according to the cup size.
- You can also set it to 'free-flow', keeping the coffee and/or hot water flowing as long as the button is pressed.
- The ventilation system in the Rivero Turbo machines ensures that BIB (Bag-In-Box) containers stay cooler than the ambient temperature. This keeps the quality of the coffee concentrate better for a longer period.
- In addition, you can of course optimise the drink settings as required.

Your Bravilor Bonamat dealer

### We recommend

- Bravilor Bonamat *Renegite* for descaling the hot water system.
- Bravilor Bonamat *Cleaner* for cleaning.
- Bravilor Bonamat BSRS 200 water filter system for minimising limescale.
