LIQUID

Rivero 12

The taste of quality worldwide

Compact and fast

The Rivero 12 offers a wide variety of hot drinks. The machine has room for three ingredients. You can serve various drinks, such as coffee, café crème, coffee with milk, cappuccino, espresso, double espresso, moccachino and hot chocolate. In addition, the machine has a separate button for hot water.

The LED lighting makes the menu easy to read. Your customers will have a delicious cup of coffee at the press of a button. You can also opt between cup, mug, or decanter.

Quality is key to Bravilor Bonamat. That's why the Rivero 12 is made from strong, durable materials like stainless steel.

Plus, the machine is equipped with the unique Bravilor Bonamat ingredient mixing systems. These prevent clogging, ensure a perfect flow of ingredients and a high in-cup quality. So, you can focus on your business, rather than the machine!

The machine warns you when the drip-tray is full, it's time to descale the machine, or rinse it. You can also check the daily and total counts. The thermos boiler and adjustable energy-saving mode ensure efficient energy consumption.

Naturally, you can optimise the drink settings to your preferences using the intuitive programming.
